

Output Module IO/AX4.3

The IO/AX4.3 module is a multifunction analogue output module that is designed to convert up to 4 x 0-10V input signals to a variety of 0-10V outputs that can be used for priority signalling, averaging and differential measurement.

The inputs and outputs can be selected to operate on 0-10V or 2-10V if required.

Specification

Power Supply:	24V AC/DC +/-10%
Input Control:	4 x 0-10V or 2-10V
Output:	4 x 0-10V or 2-10V (rated 5mA each) See diagram for AO configuration
Power Consumption:	25 mA max
Settings and Options:	See table for selections
Terminals:	1.0mm recommended 2.5mm max
Operating Temperature:	0 to 50°C
Operating Humidity:	5-80% non-condensing
Dimensions:	85mm high, 80 mm wide, 45 mm deep
Mounting:	DIN Rail
Country of Origin:	UK
Product Code:	IO/AX4.3

Connections

*Note: AI1 must be used in all applications. Analogue inputs must be used in numerical order AI1 to 4.

Wiring note: All 0-10V connections are common on the AX4 module
